

# *Winelist*

Growing grapes and transforming its juice into this extraordinary liquid substance we know as wine can be done in many forms and ways. The working method and vision can differ extremely. From mass production wines with monotonous flavours, to passionate artisan winemakers who create complex wines with character. The latter are the ones I'm constantly searching for and these are the wines we will find on this wine list. Winemakers who seemingly surprise with their wine and philosophy. Most of these winemakers always work with great care for mother nature, because ultimately she provides us with the key ingredient. Wine grapes.

Working with sustainable methods is the basic condition, though some winemakers like to take it a step further. I would like to explain the three main movements which transcend sustainability. We find these philosophies next to a logo, which we will see linked back to certain wines in this list. The logo's with a grey colour implies that winemakers are working in one of these three ways but are not certified through an agency or institute.

These are organic wines. The most important aspect here in terms of sustainability, is that there is no use of chemical and synthetic pesticides. This implies that the grapes are purer and cleaner and thus will communicate its terroir more directly.

Biodynamics take it a step further. Here it is all about the balance between nature itself, the vines and the immediate and distant environment. This system is based on the beliefs of philosopher Rudolf Steiner. This type of cultivation influences all life in the vineyard. Lunar and astrological cycles also play a key role in the timing of biodynamic practices, where most of the problems in the vineyard are solved with homeopathic remedies. These wines with minimal intervention allow layers of flavour to evolve and often show a distinctive character.

Where we see that organic and biodynamic winemaking is a strategic or technical choice, natural wine is a philosophical one. Natural wine is made without adding and removing elements during the winemaking process. There is no use of additives and intervention within the fermentation process is kept to a minimum level. Clarification and filtration is barely applied and sulphur levels are kept as low as possible. Summarised, as little action as possible in the cellar itself. This results in wines that are very much alive but are also a different expression of wines that are made in a more conventional way. Aromas and flavours can differ compared to the other styles of wine found on this wine list.

*Wines by the glass*

## White

Riesling trocken 2016 Stefan Winter Rheinhessen	€5.75,-	€30,-
